Paul

It was my pleasure to host Simon. He really put forth an out-standing effort towards helping us get a very difficult job to run. He never displayed any frustration and remained supportive the entire installation and training. As you can see by the hours he logged, we put in some long ones last week. You have a very good person there.

The level of detail your company took in refurbishing this machine is very impressive. You can ask Simon but I'm the type to crawl under a machine now and then and did so under the Col-Tec. A very pleasant surprise to see the results of your efforts. I usually won't buy equipment without inspection nor would I contract for services of a company never visited, but you all exceeded my expectations. Please be sure to pass this along to the folks involved with the refurbishment.

Hi Jonathan

On behalf of Simon and myself, thank you for the courteous attention given to him while he was attending the installation. How are your operators getting along now that Simon has left and can I ask if the refurbished machine (early days I know) meets with your expectations?

Regards

Paul Bailey

Dear John,

We have purchased a Refurbished Col-Tec, 6 station, deep pile collator.

The collator is working well ever since the installation in our printshop in February 2012.

Design of the equipment is very simple and more of mechanical styled and doesn't contain any complicated electronics.

Minor problems arising if any could be fixed at ease by local skilled technicians.

The collator is very simple to operate.

Above all the Col-Tec team headed by Mr. Paul Bailey, a thorough gentleman, is extremely co-operative.

I would recommend buying a Col-Tec Collator.

Regards,

Rohan Shirke

### Recommendation for COL-TEC collators

To whom it may concerns.

We, CBE Co. Ltd., have supplied a complete collating solution from COL-TEC to our local market. The collator is fitted with automatic deep pile feeders and a booklet maker.

We have had total satisfaction with this machine, and our customer is happy because we have provided them with a machine which is easy to operate, reliable, safe and only requires minimum maintenance.

The collator, manufactured by COL-TEC, has always given optimal performance which resulted in high production rate for the customer.

We also got complete satisfaction from the support as well as training we got from COL-TEC team who are very professional and qualified.

From our very positive experience with COL-TEC we will not hesitate to recommend anyone to use their collators.

Yours faithfully,

Lawrence BOODHOO

Morning Paul

I'm pretty perfect thanks – and I hope something similar goes for you.

The machine has been busy collating folded litho sections since we bought a new Horizon 4 clamp PUR binder – seems to have opened up a new source of work for us – excellent!

And tony (our operator) loves the collator – he is very mechanically hands on and has been applying his imagination to collate all sorts of weird and wonderful stuff.

Best wishes

Huw

Dear Huw

It is circa six months since we installed your collator and I hope that this contact finds you in good health and the machine busy?

We will be in touch again in a further six months to remind you of the annual general service but meanwhile if there are any queries you have regarding the operation of the equipment, please let me know.

kind regards

Paul B

Hi Paul

We installed the 6 x 35 x 35 yesterday and I must say the machine is generally in very good order. Thanks!!!  
The customer is pleased with the machine and we were pleased with the condition in which we received the machine.

By the way, this is the customers second machine!!

Many thanks

Paul
